This is to certify that the holder of this certificate is insured for medical expenses in connection to illness, injury and repatriation, while being abroad. In the event of death whilst abroad, the policy also covers the cost of repatriating the deceased.

A doctor with If's travel care will contact the physician/hospital treating the insured to agree to the suggested treatment. If required and it is safe to do so, then the insured will be transferred to either a superior medical facility or repatriated.

In the event of transfer or repatriation, the doctor with If Insurance will decide how and when the transport can be arranged in close cooperation with the treating physician of the insured.

If requested, If's travel care will advance payment or provide a guarantee of payment for the cost of the medical treatment in connection to illness, injury and/or repatriation.
